Subject: Clarification of Blue prints for Special Use Permit application
(UP-577-01)

1. This letter will clarify some labeling and room description issues on the blue prints for the residential construction project at 104 Riley's Place, Williamsburg, VA 23188, listed under application UP-577-01.
2. The construction plans for the in-law attachment to the home at the above address, lists a second floor room as a second bedroom. This is incorrect. The second floor room in the in-law attachment should be listed as a sitting room/storage room. The primary living space for the in-law attachment is the ground floor. The only bedroom for that attachment is on the ground floor, along with the kitchen, (which is requested in the special use permit application), a living room, and bath. The first floor bedroom will be the only bedroom in the home. The occupant for the in-law attachment, will be my mother in law, Mary Valerie Handy, a 76 year old women, suffering from the early stages of dementia. We have assumed responsibility for her day to day care and support since the sudden death of her spouse.

Respectfully,

John R. Maguire
4 Magruder Road.
Williamsburg, VA 23188
